

AIDS United 2018 Midterm Election Candidate Questionnaire

Q23. Right now, we are closer to ending the HIV epidemic in the United States than at any time in almost four decades. To better understand how Congressional candidates will work to build on the progress we have made and ultimately end the HIV epidemic, AIDS United has created this questionnaire. We ask that your campaign review and complete this survey by close of business on September 24th. This will allow us ample time to compile and release the results well in advance of the general election in November. We will publish the responses without edits. Thank you very much for your participation in this questionnaire.

Q1. Candidate First Name

Folasade

Q20. Candidate Last Name

Adeluola

Q2. State Where Candidate is Running

VT

Q21. Congressional Chamber in Race

- Senate
- House

Q22. Candidate District

This question was not displayed to the respondent.

Q3. Party Affiliation

- Democrat
- Republican
- Independent
- Other

Q4. Name of Party Being Represented

This question was not displayed to the respondent.

Q5. What are your views on the federal government's role in funding or supporting HIV research into potential treatment advances, prevention efforts, and attempts to identify a vaccine and a cure? What, if any, changes to the current HIV prevention and research agenda or funding levels would you propose?

My step-sister and her daughter had died from HIV brutality in Nigeria. I will do all that I am empowered to do as a United State Senator To Help The AIDS Epidemic.

Q6. What is your position on the use of federal funds to implement evidence-based substance abuse prevention and treatment strategies to help address opioid addiction? For example, what is your position on the use of medication to combat overdoses (i.e. naloxone) or medication-assisted treatment (MAT) to treat opioid disorders? Syringe services programs and safer injection facilities?

The Federal Government must help Its citizens to curb the spread of any diseases. It is cost effective.

Q7. The Ryan White HIV/AIDS Program provides HIV-related services in the United States for those who are uninsured or underinsured and has demonstrated its success at linking and retaining people in care, improving both individual health outcomes for enrollees, and a reduction in new HIV transmissions. What is your view of the current funding levels allocated to the Ryan White Program? What changes, if any, would you make to the program and its funding?

!!!!IF - I Become A US Senator From Vermont - I Will Push For More Federal Funding To Expand Ryan White HIV Program To Help The People ... My Step-Sister And Her Daughter Had Died From HIV Brutality In Nigeria. I Will Do All That I Am Empowered To Do As A United State Senator To Eradicate The AIDS Epidemic ... My Youngest Daughter Had Also Received Blood Transfusion At Age 11 Months Old After Her Heart Surgery ... She Could Have Been A Victim Of The Aids Epidemic ... "I Really Do Care About People" ... I Am Folasade Adeluola ... And {"I Will Not Lie To You About Medicare For All"} ... As An Insurance Agent - Who Knows How Difficult (ACA) Was To Legislate ... www.folasadeadeluola.com ... Thank You For Your Donation**!!!

Q8. What is your view of the Housing Opportunities for Persons with HIV/AIDS (HOPWA) program, which provides funding for housing assistance and related supportive services for low-income people living with HIV and their families. What changes, if any, would you make to the HOPWA program?

The housing programs in Vermont Is very bad. And I will work very hard to Improve it.

Q9. The Affordable Care Act (ACA) has provided previously uninsured individuals with public and private health insurance. Please state your position on the ACA and outline your views on the best ways to expand coverage for people who cannot afford it or were denied coverage for some other reason (be it immigration status, pre-existing condition, etc).

I am a licensed Insurance agent. And I really do understand. Anyone who is sick should automatically qualify for a medical disability payment and benefit and Insurance. And I will work very hard to improve the service that people in need are being helped expeditiously whether they are immigrants or not. The government must wait /watch while people are dying or spreading the disease.

Q10. What is your position on work requirements for Medicaid enrollees? What changes, if any, would you make to the Medicaid program?

If - People are too sick to work, They are simply too sick to work

Q11. Americans living with HIV are subject to outdated and stigmatizing criminal laws. Will you co-sponsor legislation in Congress calling for the review of all HIV criminal laws? What other steps, if any, would you take to help reduce HIV/AIDS stigma and discrimination in the United States?

We must not discriminate. And I will legislate Anti-discriminatory laws. Fairness is Fairness. The opium epidemic is just another illness like my daughter with a heat condition and people must be treated equally.

Q12. Do you support the 340B Drug Pricing program? What changes, if any, would you make to the program?

Yes - I will work to improve it. Sending home a patient without proper medication is not a solution at all.

Q13. What is your position on the criminalization of sex work?

I am neutral on the issue. I don't know enough to comment.

Q14. More than 1 in 4 transgender women in the United States are living with HIV, and violence against transgender individuals is higher in 2018 than it ever has been. What do you think should be done to protect the rights and lives of transgender people living in this country?

I do support VAWA ...

Q15. Are you familiar with Pre-Exposure Prophylaxis (PrEP), the preventative use of antiretroviral medication for people who do not have HIV, but are at a high risk of infection? Would you be supportive of expanding access to PrEP?

Yes

Q16. Similarly, are you aware of the recent scientific consensus around U = U, which stands for Undetectable = Untransmittable, that shows that a person living with HIV who is on antiretroviral medication & has an undetectable viral load cannot pass the virus to their partner? If enough people were able to achieve an undetectable viral load, the United States could begin to end the HIV epidemic in this country. Do you support expanding services to find and link as many people living with HIV as possible to treatment and to help people achieve an undetectable viral load through assistance with medication adherence programs?

Yes.

Q17. Do you support efforts to protect and provide substantial federal funding for family planning services? What is your position on the proposed rule change that would prohibit Title X funding recipients from providing their clients with a full range of medical options concerning their pregnancy, including abortion care, and increasing institutional capacity for HIV prevention services?

Yes.

Q18. Many documented and undocumented immigrants living with and affected by HIV are refraining from seeking out HIV and general medical care due to fear of deportation or denial of citizenship. Do you believe that health care providers should be safe spaces for immigrants living with and affected by HIV to seek care?

I am a licensed Insurance agent. And I really do understand. Anyone who is sick should automatically qualify for a medical disability payment and benefit and Insurance. And I will work very hard to improve the service that people in need are being helped expeditiously whether they are immigrants or not. The government must wait /watch while people are dying or spreading the disease.

Q19. What are your views on potential changes to the “public charge” rule that would make any use of a very wide range of benefits (including healthcare programs such as the Affordable Care Act marketplace subsidies, Children’s Health Insurance Program and potentially some Medicaid benefits detrimental to an immigrant’s chances at becoming a U.S. citizen?

Health problems must not be a deterrent to become a US Citizen. America is a Nation of Immigrants with opportunity for all.

Q24. Thank you for your time. Click the arrow below to submit your responses.
